TouchOffice Web

Cloud Based Business Management

ICRTOUCH
ENHANCE YOUR BUSINESS

Reach new heights with
TouchOffice Web

TouchOffice Web is a Cloud-based version of ICRTouch's popular TouchOffice software. Any time, anywhere in the world, any number of users have access to live and archive sales data via a computer, tablet, smartphone and more. TouchOffice Web connects with ICRTouch's flagship reliable and proven TouchPoint till software. TouchPoint has been developed over 15 years and (thanks to annual software upgrades) it remains cutting edge.

ICRTouch has over 30 years experience in developing and supplying EPoS systems and we've sold over 70,000 software licences.

TouchOffice Web
is right for YOUR business...

TouchOffice Web is a brilliant tool for any size of business, from a single till, to 10 tills in three branches, to 10,000 tills in 3000 branches... get the idea? For larger businesses, reports can be collated and displayed at either branch or head office level.

TouchOffice Web allows you to remotely view live sales and employee data. Plus, it's not all about the now. TouchOffice Web can access and show historical data too.

Demo Account - Touchoffice.net

Case Study

Tapas Barcelona

In the heart of Southampton's Cultural Quarter, Tapas Barcelona is a sociable venue split over two floors providing authentic tapas with influences from Spanish kitchens around the world.

The owners, Delicious Dining, also have 6 other popular venues around the local area with differing influences all using ICRTouch.

The solution needed to allow the owners of Delicious Dining to view and manage all their brands through a single management interface that could provide both combined and individual views of their entire estate.

TouchOffice Web was the ideal choice, allowing both real-time and historical reporting across the entire group or individual restaurant and remote menu or price changes from any web enabled device.
